MD ABDUL MOKADDES

SOFTWARE QUALITY ASSURANCE ENGINEER

PROFILE

Seeking a role where I can dedicate myself wholeheartedly to building quality products that make a real impact. I approach every test with a strong sense of ownership and precision, aiming to become an expert in my craft while contributing meaningfully to the team's goals and the company's success.

WORK EXPERIENCE

GCB Holding | SQA Team Lead

2026 – Present

- Leading a 3-member QA team, handling task planning, tracking, and weekly performance reports to stakeholders.
- Managing mobile QA planning and execution for iOS & Android alongside manual testing on iOS, Android, and web platforms.
- Writing test plans, test cases, checklists, bug reports, user stories, and mind maps for each feature.
- Performing UAT and UI/UX testing on new features while mentoring team members to maintain quality standards.

STRATIV | Software Quality Assurance Engineer - Level 3

2024 – 2026

- Write test cases for projects using requirements.
- Write Software Requirement Specifications (SRS) and create user flows for projects.
- Write impact analysis reports using the provided solution plans.
- Conduct API testing using Postman and load testing using JMeter.
- Perform manual testing on web applications and mobile apps.
- Prepare test reports and checklists for projects.
- Manage ERP systems and Google Sheets for project tracking.
- Verify test cases across different platforms and multiple devices.
- Document and report bugs for developers.
- Develop training modules and provide training to team members.
- Conduct regression testing using tools like Playwright.
- Develop automation scripts using Playwright, Cypress, and Appium.

Riseup Labs | SQA Engineer

2022 – 2024

- Write test cases for existing projects.
- Perform API testing with Postman and load testing with JMeter.
- Conduct manual testing on web applications and mobile apps.
- Create test reports and project checklists.
- Manage Jira, Asana, and Google Sheets for ongoing projects.
- Prepare requirement and impact analysis reports.
- Verify test cases across various platforms and devices.
- Document and report bugs for developers.
- Write UAT reports.
- Develop training modules and train team members.
- Provide customer support.

Brain Craft Limited | Junior SQA Engineer

2019 – 2021

- Perform manual tests on iOS and Android apps.
- Write test cases for the existing projects.
- Create checklist for the existing projects.
- Bug report writing for developers.
- Verify bugs in multiple devices. Regression test, smoke test, sanity test, functional test, retest, and load test.
- Maintain Jira and Trello for existing projects.
- Give customer support.
